

Calcium pHactor

DIETARY SUPPLEMENT

with CORAL CALCIUM

Osteoporosis Awareness

Osteoporosis is a disease in which bones become fragile and more likely to break. If not prevented or if left untreated, osteoporosis can progress painlessly until a bone breaks. These broken bones, also known as fractures, occur typically in the hip, spine, and wrist.

There are five steps, which together can optimize bone health and help prevent osteoporosis. The National Osteoporosis Foundation recommends:

- A balanced diet rich in calcium and vitamin D
- Weight-bearing and resistance-training exercises
- A healthy lifestyle with no smoking or no excessive alcohol intake
- Talking to one's healthcare professional about bone health
- Bone density testing

Calcium pHactor with Coral Calcium is a naturally occurring form of calcium and magnesium with over 73 trace minerals.

These statements have not been evaluated by the FDA.

Calcium pHactor Supplement Facts

Supplement Facts		
Serving Size...2 Capsules	Servings Per Container.....60

KEEP OUT OF REACH OF CHILDREN.

Magnesium, calcium, and potassium play a vital role in the support for a healthy body. The combination of nutrients in **Calcium pHactor** also helps maintain the correct acid and alkaline balance of the body. Studies show that with the correct acid and alkaline balance that many diseases cannot survive in the body. Collected from above the sea with ecological safety, our **Coral Calcium** is gathered from the highest grade marine coral available in Okinawa, Japan. When **Calcium pHactor**, with its **Coral Calcium**, is mixed with water it becomes what the Japanese call "Milk of the Ocean".

Excellent Support For:

**Osteoporosis Joint Pain Bone Spurs
Rheumatoid Arthritis
Carpal Tunnel Syndrome**
