*daily routine
for proper
skin
maintenance*

Step 1 - CLEANSE

Massage CLEANSE over entire face for two minutes with your middle and ring fingers using an upward and outward motion. Use a figure eight pattern around eye area working from corner of eye in toward the nose, then up to the eyebrow, and back under the eye to complete a figure eight. After CLEANSE quickly and gently loosens make-up, surface oils, and impurities, you can easily remove them with a warm face cloth. Follow the cleansing procedure with the appropriate TONE, using a cotton ball or pad to pick up any remaining traces. Repeat with TONE until no evidence of residue or impurities remain on the cotton ball.

Step 2 - HYDRATE

Now that your skin has been cleansed, toned, and stimulated, it is time to Hydrate the skin. Apply MINKCEL Oil of Mink by dotting it on your face and massaging it in using the same techniques used with the CLEANSE and The LIFT Conditioner. MINKCEL Oil of Mink adds oil to dry skin and helps decrease oil production for those with oily skin. MINKCEL Oil of Mink also gives the skin a rich velvety feel which makes it an excellent component to a good skin care routine. MINKCEL Oil of Mink will quickly disappear as it rapidly absorbs into the skin.

For optimal benefit, now apply Sensational Silk Correcting Serum around the eye area for fine lines and wrinkles or NoTOX Serum for deep lines and wrinkles. You may also use the ReCell Rx Apple Stem Cell Repair prior to applying the Minkcel Oil of Mink.

Step 3 - PROTECT

Protection from the harmful elements of the environment is also important in maintaining beautiful skin. Use HYDRATE Moisture Balancer to hydrate and protect your skin all day long. Nature's Moisturizing Factor, NMF, which is found in the HYDRATE Moisture Balancer, continually draws moisture from the air to hydrate your skin throughout the day. HYDRATE Moisture Balancer also creates a barrier to harmful elements and impurities in the environment while still allowing your skin to breathe.
